

## Alternative Disposal Options to Clean Sweep and What to Do With Items That Cannot be Taken During the Clean Sweep

Sauk County residents with unused chemicals, paint, waste motor oil, or medications can dispose of them in a safe and environmentally sound manner at a Hazardous Clean Sweep Program. This program is held annually which can leave Sauk County residents holding onto their waste for up to months at a time. This list of alternative disposal methods is for county residents to use as a resource tool when looking for disposal methods for waste.

The Sauk County Conservation, Planning and Zoning Department does not endorse or recommend any businesses on the list. The alternative disposal list is provided as a service to the residents. To be added or removed from the list contact Gail Greve at 355-3245 or at [ggreve@co.sauk.wi.us](mailto:ggreve@co.sauk.wi.us)

\* Denotes there is a charge for this service. Please call the vender for pricing.

- **Fire & Safety II, Inc.**, (608) 356-6861

Latex Paint

**At home disposal methods:**

- **Return it:** If you have a full unopened can of a stock color (not custom tinted paint) check with your dealer or retailer to see if you can return it for a refund.
- **Use it up:** The best thing to do with usable Latex paint is to use it up. Apply a second coat or touch up area that need improvement.
- **Share it:** If you cannot use leftover Latex paint try to share it with a neighbor, friend, or community group. Make sure that any product you provide is in the original container with the label intact and not contaminated with other products.
- **Evaporate it:** Latex paint products cannot be disposed of in liquid form in most landfills. Unusable Latex paint can be safely disposed of by allowing the liquid to evaporate. When the paint has hardened completely, it may be placed in the regular trash.
- **To evaporate small amounts of Latex paint:**
  1. Move paint container to a sheltered, secure outdoor area away from flames, children and pets. Locked screen porches and balconies work well. Some old Latex paint contains mercury so it is important to dry out paint in a safe, well-ventilated area.
  2. Remove the lid and let paint dry in the can. Stirring the paint occasionally will speed up the drying process.

Municipality

Disposal Method

3. Discard the can of dried paint in the trash. Leave lid off can so the trash collector can see that the paint is dry.

- **To evaporate larger amounts of Latex paint:**

1. Line a medium-size cardboard box with a heavy plastic trash bag, and place it in a secure, well-ventilated area away from flames, children and pets.
2. Pour Latex paint into the lined cardboard box.
3. Add an equal amount of kitty litter or oil dry.
4. Mix the paint and dry material by stirring with a stick. Stirring the mixture every few days will speed up the drying process.
5. When the mixture is hard and dry, remove the bag from the box and place it in the trash.

Smoke Alarms

- **PKK Lighting** in Middleton. These CANNOT be landfilled because of the radioactive material in them. Please call Rick Portz at (608) 836-7821 for more information
- **Smoke alarms** that contain a small amount of radioactive material will be labeled and should be returned to manufacturer for disposal. Otherwise smoke detectors may be disposed in the trash.
- **Return to manufacturer** - The majority of smoke detectors sold in the United States are made by First Alert and the Kidde Corporation. They will recycle them if you return them at your expense and pay \$1.00 for a disposal fee. In order to use their system, you must call them at 1-800-323-9005 (First Alert) or 1-800-880-6788 (Kidde) and set up an account to pay either by credit card or check. Many other smoke detectors are made by a Canadian firm called American Sensors. You can contact them at 1-800-387-4219 for information. Both First Alert

Municipality	Disposal Method
	and American Sensors sell detectors under many different brand names, and can dispose of any of them.
